Front End Developer & Product Designer

I'm a UI focused front end developer and product designer with a passion for CSS. I've previously worked as a graphic designer, web developer and currently a senior front end developer.

Experience

2018 - Current
Akero - Senior Front End Developer

Promoted to a senior front end role at Akero, involving more decision making and mentoring another front end developer. This role has required more javascript development alongside CSS and markup development.

Built with AngularJS but starting a migration over to Vue.

2014 - 2018
Akero - Front End Developer

Hired as the first front end developer to lead the design and front end of the CRM/landing page builder platform. Eventually redesigning the system from the ground up, and rebuilding the entire front end with a more component focused approach.

Main focus was UI development with CSS and HTML but built with AngularJS.

2010 - 2014
Design Image - Web Developer

Designing and building various client websites, building out the front end and then implementing custom wordpress themes for the majority.

2006 - 2010
Design Image - Junior Graphic Designer

Design agency where I completed a variety of projects for clients such as Royal Navy, Keds Shoes, Huawei, housing associations and many more. Works include; brochures, branding, website designs, exhibition stands, signage, vehicle wraps and more.

Skills

CSS, HTML, Javascript, Git, UI/UX Design, User Research

AVCE Graphic Design & Photography

About me

Born: April 2 1988
Living in Southsea, Hampshire

In my free time you can find me usually listening to music, going to live music (a lot) and watching American football. Although, more than likely I will be working on some DIY on the house, which seems to be a never ending project!
